ROCKEY Dongle
Feitian Technologies was among the first to support User Defined Algorithms with its ROCKEY4 product, and sets the standard for innovation with ROCKEY5 - an affordable smart card based solution providing the highest levels of software protection.

ePass Network Token
ePass1000, ePass2000 are portable USB attached network tokens. Ideal for PKI and smart card applications: two-factor authentication, E-mail encryption, SSL secured websites, password consolidation, secure login and more.

ROCKEY SmartCard Reader
ROCKEY 100/200 are SIM and smart card readers, supported by Windows, MAC and Linux operating systems, compatible with smart cards that comply with ISO 7816-3, standard PC/SC interface.

▶ **FEITIAN Released Driverless Dongles and x64 anti-Piracy solution** - Oct 24, 2005

Oct. 10 2005 Beijing, China, FEITIAN as a leading technology innovator, released driverless dongles and x64 software protection solution. With help of driverless software protection dongles, ROCKEY4ND and ROCKEY6 smart, software developers enjoy the fun and ease form the full 64-bit software protection solution. Such solution provides protection not only for 32-bit software running in 64-bit operating system, but also the native 64-bit applications.

Thanks for the driverless dongle from FEITIAN, software vendors may forget the headache of driver installation, and enjoy the stability and convenience that brought by ROCKEY4ND and ROCKEY6 Smart.

ROCKEY4ND is the updated and driverless version of ROCKEY4, which is the popular software protection dongle from FEITIAN. ROCKEY4ND has all the features of ROCKEY4 with a larger memory (up to 1k), and developers may 128 instructions in the User Algorithm Zone and 64 modules. ROCKEY4ND is fully compatible with ROCKEY4.

ROCKEY6Smart is a driverless smart card software protection dongle with a 32-bit CPU inside. FEITIAN introduced the smart card technology into the software protection area and combined it with other cutting-edge technologies. With help of ROCKEY6 Smart, FEITIAN brings an new anti-piracy idea to customers.

Driverless technology provides a novel solution for both end-users and software vendors. No driver is needed to install a dongle. Customers may avoid the problems that occur in the driver

installation and share the benefits of new technologies that brought by FEITIAN.

▶ **Holiday Notice** - Sep 26, 2005

▶ **Feitian Becomes First Entrust Ready Partner in China** - Apr 5, 2005

Entrust
Ready

Along with the Chinese New Year, Feitian's ePass Security Token passed Entrust Ready certification, making Feitian the first Entrust Ready Partner in China. Feitian's ePass security token provides drop-and-go integration with Entrust/PKI enabling secure storage of the users' confidential information in encrypted form on their ePass token.

Feitian's ePass Security Tokens are secure portable cryptographic tokens, ideal for Entrust/PKI and other smart card applications: two-factor authentication, e-mail encryption, SSL secured websites, VPN logon, and more. ePass has been granted Entrust Ready status with the Entrust Entelligence client and Entrust Authority Security Manager.

Entrust, Inc. is the global leader in securing digital identities and information. Through technologies such as encryption, authentication and advanced content scanning, Entrust has enabled customers to apply security policies and procedures that protect information and help fulfill regulatory demands, while still empowering users. Since 1994, Entrust Technologies has been providing award-winning solutions that provide a unified approach to managing digital identities and information security across a wide variety of devices, applications, platforms and environments.

▶ **Feitian will come back to Hannover Germany for CeBIT 2005** - Dec 8, 2004

Get the spirit of tomorrow

Hannover, 10 - 16 March 2005

Feitian will come back to Hannover Germany for the CeBIT Exhibition March 10-16, 2005. As before, our German distributor, RS-Computer, will participate with us. CeBIT Germany is the No.1 information technology exhibition on the globe. Please come see us in Hall 7, Stand B46.

▶ **Feitian will participate in the 2005 RSA Conference** - Dec 8, 2004

Feitian will participate in the 2005 RSA Conference in San Francisco from February 14-18, with one of our USA distributors, Security Tokens. RSA Conference brings together the world's largest gathering of information security professionals. Please come visit us at Booth No.1506.

▶ **Feitian at COMDEX Brasil** - Sep 3, 2004

Feitian participated in COMDEX IT Brasil, the largest IT exhibition in South America, along with over 500 other companies. Feitian showcased its ROCKEY and ePass family of products to a varied audience interested in the latest technology and available security solutions. "Although COMDEX is not specifically focused on security, the Brazilian government's recent endorsement of open source software and PKI, presented an unusually large number of opportunities for Feitian's ePass family of products in banking and government security solutions" said Mauro Moreira, Pronova Solucoes Inteligentes. "We met with many potential partners and customers, and will soon be announcing a number of key agreements as a result of our very successful meetings here", said Cecile Stadler, Feitian's VP Global Marketing. "Unlike our competitors, Feitian has continued our focus on producing high quality security components, and have just released or announced new products that are particularly well suited for the Brazilian market".

▶ **Feitian Technologies Certified on Check Point Next Generation Internet Security Platform** - May 20, 2004

Feitian's ePass2000 Integrates with Industry's Most Recognized Security Framework

Beijing, China "CMay 12th, 2004 Feitian Technologies Co., Ltd., today announced that its

ePass2000 has achieved OPSEC™(Open Platform for Security) certification from Check Point Software Technologies Ltd. (NASDAQ: CHKP), the worldwide leader in securing the Internet. Through OPSEC certification, ePass2000 seamlessly integrates with Check Point's market-leading VPN-1®/FireWall-1®Next Generation™software.

The integration of ePass2000 token and Check Point VPN-1 SecuRemote / SecureClient enhances security by means of storing a digital credentials (private / public key pair and X.509 certificate) on a PIN-protected token. Furthermore, the ePass2000 software provides flexible tools, customizing the token, placing digital credentials on a token, and taking full possible advantage offered by the Check Point VPN-1 / FireWall-1 solution with digital certificates.

Feitian Technologies is a solution provider and manufacturer of USB security devices used for software protection, network authentication and secure applications. Our mission is to protect the information and software assets of your business by providing cost effective products that allow you to easily build security into your applications and network.

About Check Point's OPSEC™

OPSEC (Open Platform for Security) is the industry's open, multi-vendor security framework. With over 350 partners, OPSEC guarantees customers the broadest choice of best-of-breed integrated applications and deployment platforms that support Check Point's Secure Virtual Network Architecture. Products that carry the OPSEC Certified seal have been tested to guarantee integration and interoperability. For complete OPSEC Alliance program information, including partner and product listings, the freely available OPSEC SDK (software development kit) and evaluation versions of OPSEC Certified products, visit http://www.opsec.com.

▶ **Feitian Participates in CeBIT 2004** - Apr 6, 2004

HANNOVER, GERMANY, March 24, 2004 - Feitian Technologies Co., Ltd concludes its weeklong participation in CeBIT, the world's largest ICT trade fair – held each year in Hannover, Germany. "The show was great for us" said Cecile Stadler, Feitian's VP Global Marketing. "With the heightened awareness of security everywhere, interest in simple security products like ePass was high. We met many potential partners from all corners of the globe, who are now looking at building security solutions around Feitian's ePass product. Interest from developing countries was especially strong, where security needs are high but security budgets are not." In addition to ePass security tokens, Feitian displayed its ROCKEY software protection dongles and smart card readers.

▶ **Feitian Appoints New Vice President Global Marketing** - Jan 14, 2004

BEIJING, January 13, 2004 - Feitian Technologies Co., Ltd today announced the appointment of Cecile Y Stadler as Vice President Global Marketing. Ms. Stadler will lead Feitian's International Marketing and Sales teams to expand the presence of Feitian's USB and smartcard security products to international markets.

Prior to joining Feitian, Ms. Stadler was founder and CEO of Traxit Technology, and held key management positions at Cybersmith, Houghton Mifflin, Stratus Computer, and CCA. With her

contribution, we are sure that 2004 will witness our successful growth in international markets. Ms. Stadler studied at the University of Michigan and MIT. She is a first generation American Chinese, comfortable in both east and west cultures. Ms. Stadler replaces Mr. John O'Mara who has been with Feitian for several years and is returning to USA.

► **Feitian Technologies announces release of ROCKEY5 smart card dongle.** - Sep 3, 2003

August 11, 2003– Feitian Technologies, one of the leading manufacturers of software protection dongles, announced the release of a smart card based software protection dongle.

ROCKEY5 is standards based smart card reader that ships with a smart card that is specifically configured for software protection. "Now the same technology used to protect the most sensitive financial transactions is available for protecting software as well. And since the operating system and support software were built by Feitian from scratch for the purpose of software protection, the product is uniquely powerful, easy to implement and cost effective," said Huang Yu, Feitian Technologies COO at a recent announcement event.

ROCKEY5 ships with an integrated development environment that allows developers to write, edit, compile and test code for execution in the dongle. The concept behind the product evolved two years ago when it became apparent that the cost for smart cards and readers would fall to the point to make them commercially viable for software protection. Huang Yu also remarked, "The idea could not be more simple. The developer compiles a part of the application code to run inside the smart card's protected environment. The idea is simple but the results are powerful."

► **Cards Asia 2003** - Jul 30, 2003

Cards Asia 2003, an important 3 day exhibition of card technology and information security products, was slated for July 23-26, 2003 in Singapore. Exhibitors from Singapore, Malaysia, China, Japan, United Kingdom, France, Belgium,Germany, Sweden, Switzerland, Russia and Italy joined together to showcase the best security technology in Asia and the world. Visitors from Thailand, Malaysia, Hong Kong, China and elsewhere walked the floor to gather information about technologies that will shape the cards based security market for the entire region. China was well represented by Feitian Technologies, WatchData, TianJing Boyuan and others.

► **Feitian Achieves XP Signature** - Jul 1, 2003

ePass1000 and ePass2000 network tokens awarded Microsoft XP signature.
Microsoft's XP signature program insures that device drivers conform to rigid quality and interoperability standards set by Microsoft. Feitian Technologies is the first Chinese manufacturer of authentication tokens to achieve XP signature.

▶ **USB Shell Water & Dust resistant** – Jun 4, 2003
Feitian recently introduced the D1 case for USB products. The D1 case is a protective shell for USB devices that forms a single dust and water resistant enclosure for internal circuitry. It represents an advance over cases based on the more commonplace "extrusion press" and "ultrasonic weld" technologies and offers the following advantages:

Advanced Structure Design

1. The D1 case is a seamless one-piece enclosure based on advanced materials and production technologies

■ D1 is extremely hard yet flexible and will thus extend the service life of the enclosed USB product.

■ Its tamper evident design prevents undetected physical attacks on hardware.

■ It is resistant to environmental problems caused by dust, water or vibrations.

2. The D1 case is compact (55X18.7X9mm), light weight (20g) and convenient to take it with you.

Sleek Design

1. Streamlined design fits comfortably in your pocket.
2. Professional looking color.
3. "Finger-notch" design makes for easy plug and unplug from USB port.
Customer reserved oval logo space (19X6mm) makes customization a snap. Feitian will recommend logo printers to customers who want their product labeled.

Several Feitian customers have switched to the D1 case for the reasons presented above and the feedback has been very positive. At present this case only supports the **ePass1000** network token. Soon Feitian will also offer the ROCKEY software protection dongle products in the D1 case as an option. Please try the D1 case today!

► **Microsoft Partnership** - May 21, 2003

Feitian Technologies has partnered with Microsoft Corporation to enhance the security of Microsoft's Simplified Chinese version of Windows Server 2003. Feitian's ePass1000 USB token supports Windows 2003 smartcard log-on, smartcard VPN log on, wireless log on, encryption and digital signature of email.

► **Australia CeBIT** - May 10, 2003

May. 10, 2003
During May.6-8, 2003, Feitian was one of 427 exhibitors attending the Australia CeBIT held in Sydney.

A diverse group of exhibitors from 15 countries, including such firms as Microsoft, Intel, Cisco, Motorola, Sony, Samsung, LG and others showcased their best technology and products attracting approximately 20,000 attendees.

Actually, this is only the beginning of Feitian's marketing effort in Australia. The ePass network token brightened the eye of many visitors to our booth. Follow-up steps will be taken in Australia in order to set up partnerships and network channels.

► **RSA News** - Apr 20, 2003

On April 13 to 17 Feitian Technologies attended the RSA Conference 2003 at the Moscone convention center in San Francisco. RSA boasts the world's leading e-security conference and

Feitian Technologies: Copy Protection, Software Protection, Access Control, Digital Rights Management, Dongle, Smart Card ...   Page 8 of 8

exposition. Feitian made contact with many of the leading companies in the e-security market as part of a push to introduce the ePass line of network token to the US and beyond.

▶ **SC Magazine Evaluation** – Apr 15, 2003

ePass2000 achieves four star recommendation from SC Magazine.

SC Magazine is an internationally respected voice in the information technology marketplace. SC magazine evaluated several authentication products for: Features, Ease of Use, Documentation, Support and Value. Feitian's ePass2000 token ranked at or near the top in each of these classifications.

About Feitian

Feitian Technologies was organized in 1998 with the mission of creating world class software security products. Feitian expanded quickly. Within a few years it opened offices in Shanghai and Guangzhou. In 2003 it opened yet another office in Chengdu to provide strong coverage of the major markets on the China mainland. Feitian's product lines expanded as well. ROCKEY1 was among the first commercial dongles manufactured in China and reflected the leading standards of the time. Today Feitian has emerged as an innovator in the field. The ROCKEY5 dongle employs the latest in smart card technology. Feitian intends to continue to leverage its core competency in smart card related development to provide our customers with stronger and more flexible solutions for enforcing their licensing agreements.

In 2000 Feitian released the ePass1000 network authentication token along with its first PKCS and CAPI middleware for the Windows platform. Development on the ePass2000 token began several months later. ePass2000 uses a smart card to securely store digital certificates and internally process encryption algorithms.

The ROCKEY100 and ROCKEY200 smart card reader technology followed the ePass development efforts. ROCKEY100/200 are USB attached smart card readers that support the PC/SC interface and relevant ISO standards.

Today Feitian is a fast growing privately held firm with a growing stake in markets outside of China. Feitian's commitment to the IT security field may be seen in its growing roster of product lines and development partners.
